About the front cover

L.vannamei has been the undisputed candidate species for aquafarming in India especially during the last three years. With rising disease incidences in *L.vannamei* farming, there are increasing attempts at finding alternatives which are aimed at the export market.

AQUA AQUARIA 2015, a biennial event conducted by the MPEDA focussed on alternate species like seabass, tilapia, mudcrab etc. However, which of these species grabs the farmer psyche is yet to be established.
