About the front cover

Livelihood protection for fishers is an important focus area for development agencies. Mangalore Fisheries Centre of CMFRI has helped fishers of Karnataka in setting up cages in the backwaters. The centre reports that this initiative has helped the fishers earn their livelihood during the lean season and has also help reduce wastage as the juveniles which were earlier discarded or sold at a low price are now grown for upto two years in the cage. The report is included on page 34.
